END-WOOD FLOORING,
MADE BY
WOOD-MOSAIC CO.

Rochester, N. Y. (Salesroom, 821 Fifth Avenue, New York), consists in small blocks of various woods, set on end and securely joined by lead forced in the molten state into grooves surrounding the blocks. By the direction of the grain the greatest durability and hardness of surface are attained. Indeed, such floors are to ordinary parquetry as improved Nicholson pavement is to the old plank road. The relatively minute division of the wood permits the greatest variety of design, and contributes materially to the noiselessness and elasticity of tread by which the work is characterized. An illustrated catalogue, with miniature sample sent to any address.
